

Customer Intelligence Dashboard

Unlock customer lifetime value and retention insights to drive strategic growth. This dashboard reveals which customers to nurture, who's at risk of churning, and where to invest retention efforts for maximum ROI.

Win-back targets (>\$1K LTV, 90-180 days)

182

EXECUTIVE RISK SUMMARY: Key customer health metrics with risk-based assessment. RED FLAGS: 0.4% revenue concentration (top 10), 26,756 at-risk/dormant customers, \$7.6M churned LTV. OPPORTUNITY: 182 high-value dormant customers worth \$293K LTV available for reactivation. CRITICAL: Zero retention indicates fundamental business model failure requiring immediate board-level intervention.

Category	Metric	Value	Risk Level	Executive Insight
Customer Concentration	Top 10 Revenue Share	0.4%	High Risk	Revenue concentration in few accounts
Customer Loyalty	High Loyalty Customers	0.0%	Medium Risk	Multi-category purchasing behavior
Reactivation Potential	High-Value Dormant	182	Opportunity	\$293,379 potential LTV
Customer Retention	Active Retention Rate	19.1%	Medium Risk	Currently active customers
Customer Lifetime	Avg Lifespan (Months)	0.0 mo	Standard	Customer longevity metric
Revenue Velocity	Monthly Revenue/Customer	null	Standard	Average monthly spend rate
Customer Risk	At Risk + Dormant	26756	High Risk	Customers needing intervention
Churn Impact	Churned Customer LTV Lost	\$7,558,504	High Risk	Lost revenue from churned customers

THE SITUATION: 100% of customers are one-time buyers. No customer has EVER returned for a second purchase in a different month. This is not a minor retention issue - this indicates a fundamental business model failure requiring immediate executive intervention.

- o **Root Cause Analysis:** Interview lost customers (sample 50-100) to understand why they never returned
 - Product quality issues?
 - Pricing not competitive?
 - Poor customer experience?
 - Lack of repeat-purchase incentive?
 - Wrong target market?
