

Executive Risk Dashboard

Executive Risk Intelligence

Business Context: This dashboard provides CFO-level risk analytics across four critical dimensions impacting revenue stability, operational resilience, and capital efficiency.

Key Findings:

- Revenue Concentration Risk: Pareto analysis reveals dependency on top SKUs - high concentration = supply chain vulnerability
- Distributor Dependency: Single-point-of-failure risk from overdependence on key distributors affecting bargaining power
- Inventory Aging Exposure: Working capital locked in slow-moving stock with estimated write-off risk by aging bucket
- SKU Profitability Matrix: BCG positioning identifies high-revenue SKUs with low operational efficiency

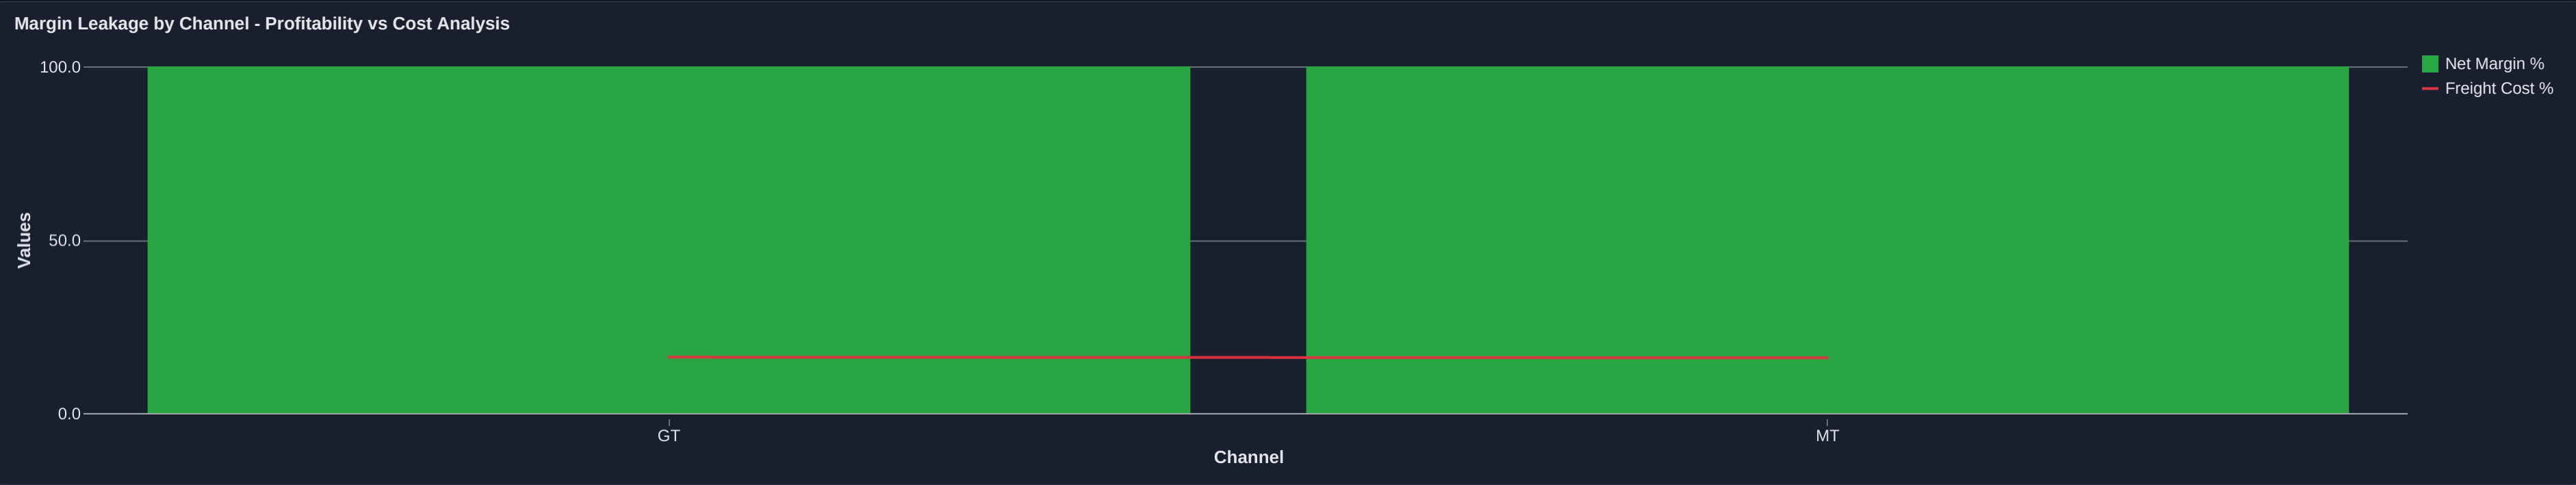

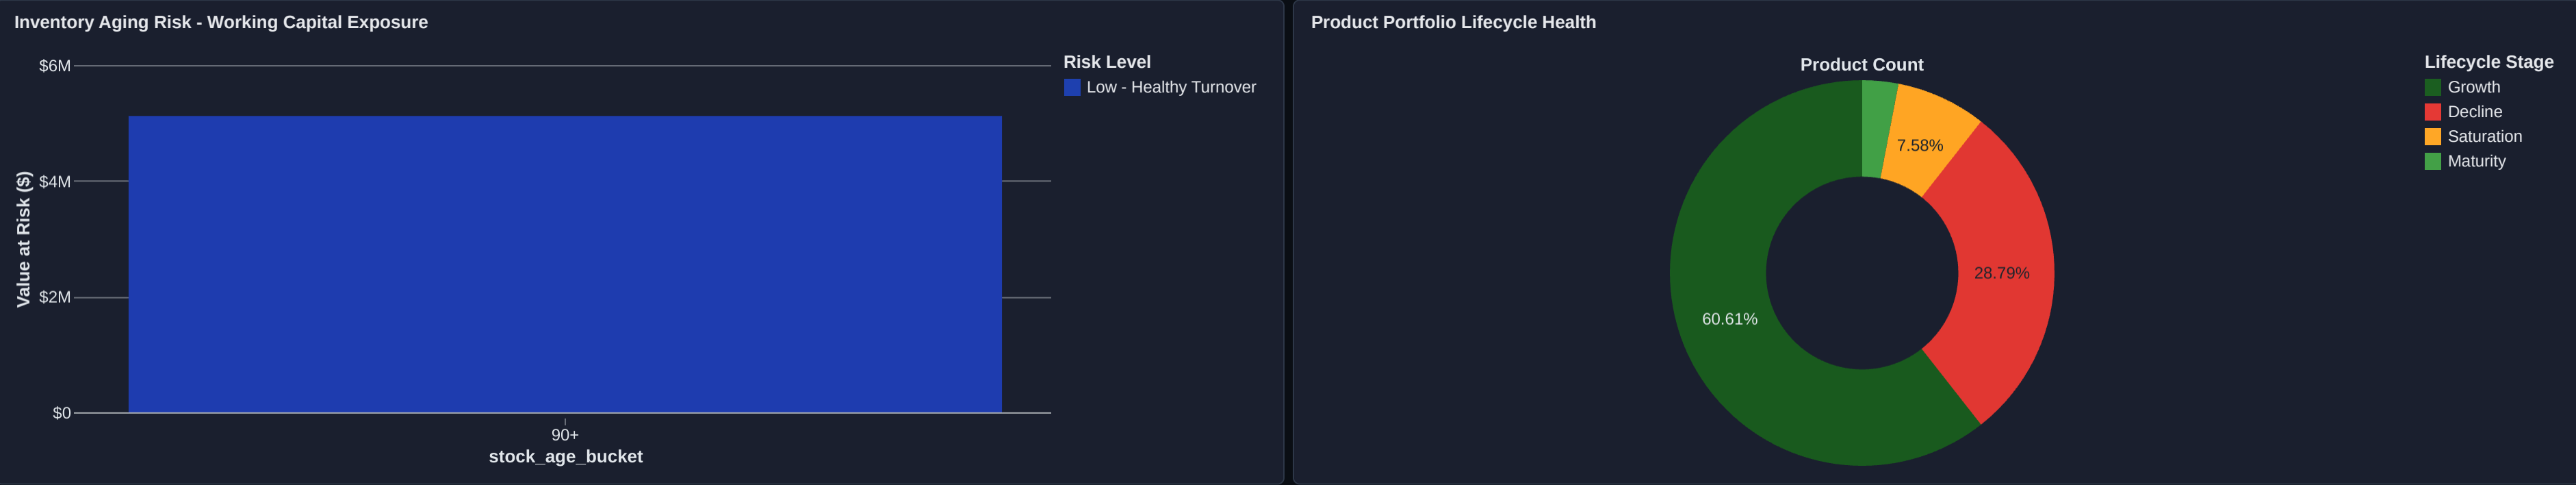

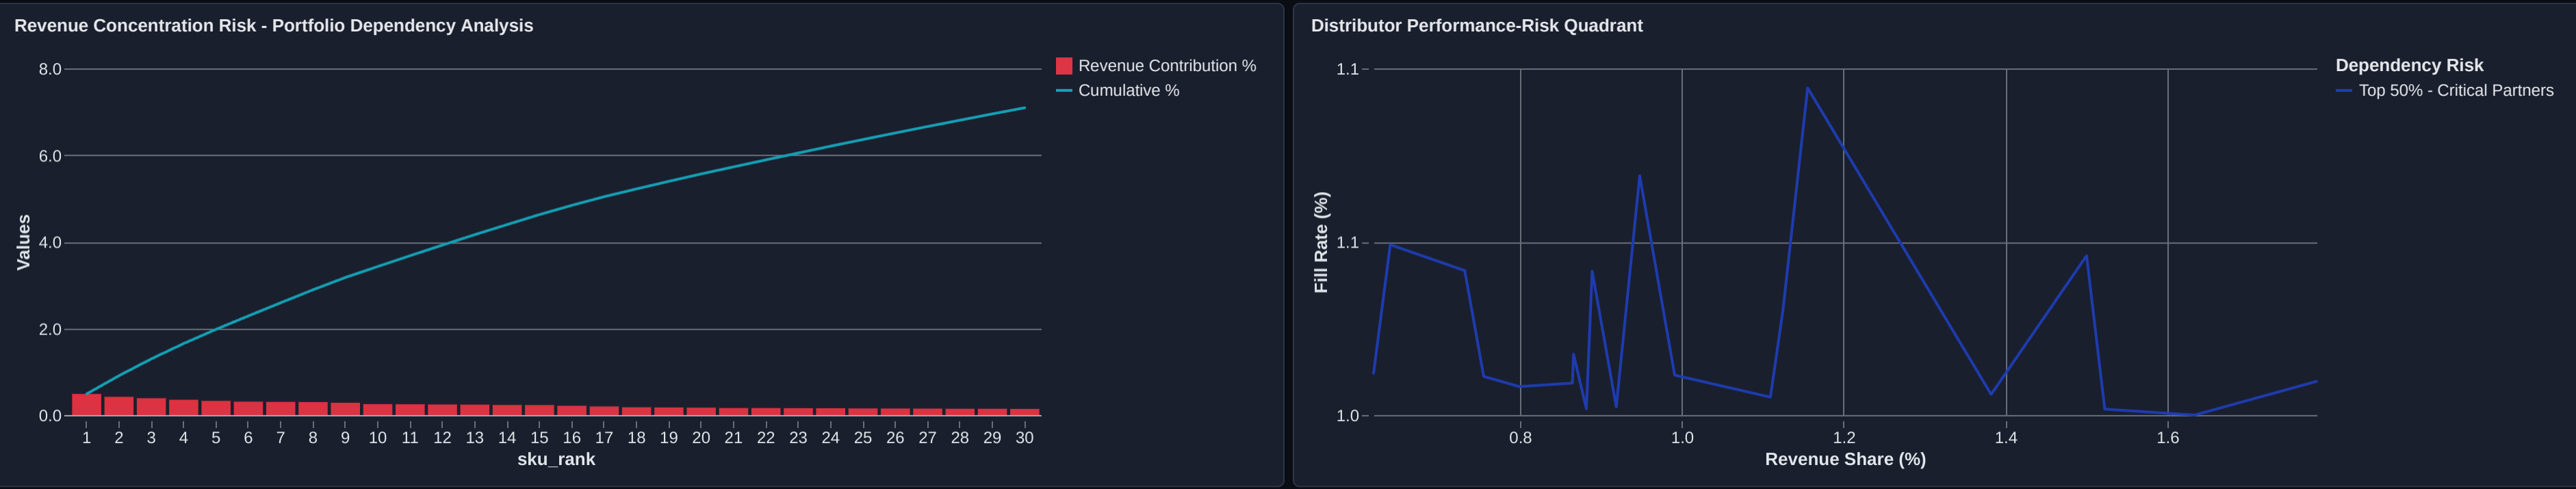

Executive Action: We identified strategic risks requiring immediate portfolio diversification, distributor relationship rebalancing, and inventory optimization to improve cash flow and reduce operational risk exposure.

Revenue at Risk - Top 3 SKUs

Strategic SKU Portfolio Actions

EXPAND (High Margin + Growth):

- Star SKUs → Increase inventory 30%, expand distribution
- Niche Winners → Scale selectively in premium channels

MAINTAIN (Revenue Drivers):

- Cash Cows → Optimize costs, defend market share
- Top 20 SKUs → Protect supply chain, monitor competition

REPOSITION (Potential Turnaround):

- Question Marks → Test price elasticity, improve positioning
- Moderate volatility SKUs → Add promotional campaigns

DISCONTINUE (Resource Drain):
